

SmartIC+ with forks lock

DO YOU WANT TO MONITOR YOUR BATTERIES?

Monitors battery data:

- Measured instantaneous data: V, I, T, and Ah
- Storage and analysis of history data
- Statistics analysis
- Data download onto a PC

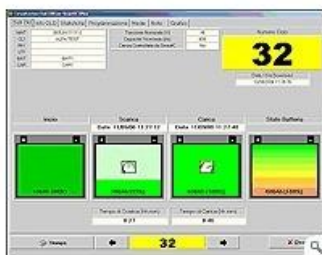

Preserves battery efficiency:

- Forks lock due to empty battery
- Charge control with SmartCB

SENDING BATTERY DATA TO A PC

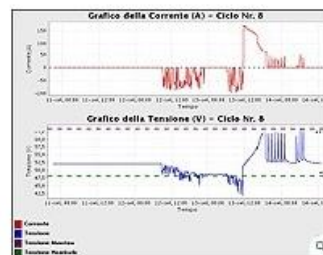

Through the IR adapter alla data are sent to the SmartView II PC programme, which makes it possible to display them in form both of working cycles and diagrams. In addition SmartView II offers tools to analyse battery efficiency, effectiveness of the charging process and way to use.

DISPLAYING WORKING CYCLES

Storage of 200 working cycles (Discharge/Charge)

- Discharge time and capacity
- Reinstated capacity and charging time
- Working cycles details
- Battery faults and failure occurring during the charging process

Operating voltage and current diagrams

- Date and time of the working cycle
- Zoom function to display details
